- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in June, 2005 and no WBCR was observed. Three sites were accesseed and all were dry, but only one was in the classified segment. It was about 0.5 mile from the mouth and thus it was deemed to represent the contitions of the evaluated segment. The area is in a drought, but the committee decided there would not likely be depth enough for WBCR unless it was raining. The committee recommends removing the WBCR designation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
